EXECUTIVE SUMMARY — High-level, evidence-based overview

This document is a deterministic, static analysis of `acme-portfolio`. The codebase contains `8 files` across `5 languages`, with `92 lines of code` and `5 detected technologies`. Primary language is `HTML` (50.2%). Architecture inferred as `frontend`: Frontend-only architecture: static site rendered in browser, optionally calling external APIs. Evidence: `HTML/CSS/JS` without server framework.

Stack Framer Motion, Vite, Tailwind CSS, React, Axios	Languages HTML 50.2%, JavaScript 20.4%, JSON 12.5%, CSS 10.1%
Files 8 total • 5 source • 0 images	Health 0 security notes • 3 API calls • 0 DB signals

Confidence model: Confirmed (manifest) • Detected (import/config) • Inferred (heuristic) • Unknown. No claims are made without evidence.

PROJECT OVERVIEW — Name, purpose, and structure at a glance

Project: `acme-portfolio` | **Analyzed:** 2026-08-28 | **Duration:** 42 ms

README excerpt (evidence, truncated):

```
# Acme Portfolio

A modern portfolio built with React + Vite + Tailwind CSS.

## Setup

```bash
npm install
npm run dev
```

Features: hero, about, services, portfolio, contact form, responsive.
```

Vital statistics

| | | | |
|-------------|----|--------------|---|
| Total files | 8 | Source files | 5 |
| LOC | 92 | Ignored | 0 |
| Images | 0 | Docs | 1 |

PROJECT GOALS — Inferred purpose from code evidence

- Provide a contact/enquiry interface for user communication
- Showcase projects or portfolio items
- Integrate external services and data via APIs

Goals are inferred from detected features; not claimed as confirmed requirements.

TECHNOLOGY STACK — Evidence-backed frameworks, libraries, and tools

Animation

| | |
|--|--|
| Framer Motion ^10.0.0
detected • dependency:framer-motion@^10.0.0,
import:framer-motion in src\main.jsx | |
|--|--|

Build Tool

| | |
|---|--|
| Vite ^4.4.0
confirmed • config:vite.config.js, dependency:vite@^4.4.0 | |
|---|--|

CSS

| | |
|--|--|
| Tailwind CSS ^3.3.0
confirmed • config:tailwind.config.js, dependency:tailwindcss@^3.3.0 | |
|--|--|

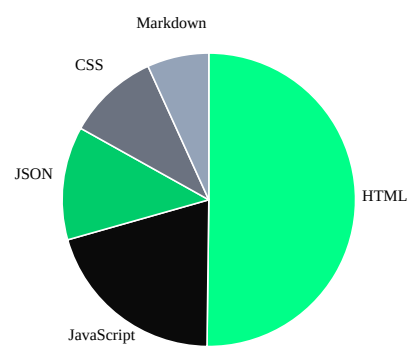

Frontend

| | |
|--|--|
| React ^18.2.0
confirmed • dependency:react@^18.2.0, dependency:react-dom@^18.2.0 | |
|--|--|

Network

| | |
|---|--|
| Axios ^1.5.0
detected • dependency:axios@^1.5.0, import:axios in src\main.jsx | |
|---|--|

Language distribution (by bytes)

HTML – 50.2% • 1 files • 40 LOC
JavaScript – 20.4% • 3 files • 15 LOC
JSON – 12.5% • 1 files • 19 LOC
CSS – 10.1% • 1 files • 6 LOC
Markdown – 6.8% • 1 files • 12 LOC

PROJECT STATISTICS – Measured, not invented

| | | |
|-------------------------|----------------------------|--------------------------|
| 8
total files | 92
lines of code | 6
dependencies |
|-------------------------|----------------------------|--------------------------|

Largest files

| File | Size |
|--------------------|--------|
| index.html | 1.4 KB |
| src\main.jsx | 0.4 KB |
| package.json | 0.3 KB |
| src\style.css | 0.3 KB |
| README.md | 0.2 KB |
| tailwind.config.js | 0.1 KB |

Available scripts (package.json)

```
dev: vite
build: vite build
preview: vite preview
```

ARCHITECTURE – Inferred from frameworks, APIs, and data layer

Frontend-only architecture: static site rendered in browser, optionally calling external APIs.
Evidence: HTML/CSS/JS without server framework.

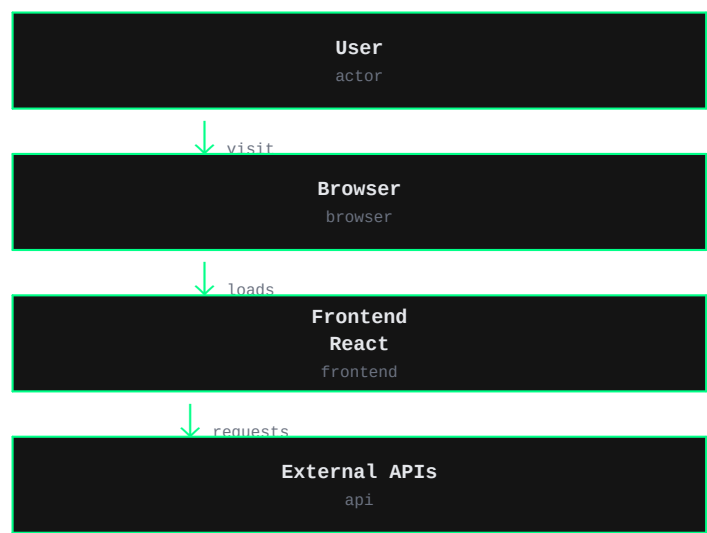

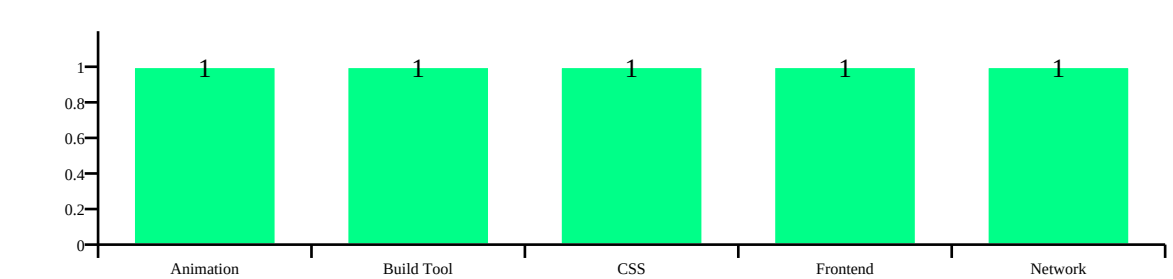

Diagram is schematic, derived from detected layers; not a runtime trace.

Frameworks by category

PROJECT STRUCTURE – Visual file tree – summarized for large projects

```
sample-project/
├── src/
│   ├── main.jsx (0KB)
│   ├── style.css (0KB)
│   ├── .env.example (0KB)
│   ├── index.html (1KB)
│   ├── package.json (0KB)
│   ├── README.md (0KB)
│   ├── tailwind.config.js (0KB)
│   └── vite.config.js (0KB)
└──
```

Showing summarized tree of 8 files. Ignored: 0 (node_modules, .git, etc.)

FEATURES — UI & functional signals — evidence required

| Feature | Confidence | Evidence |
|----------------------|------------|---|
| API Requests | detected | pattern:fetch\s*\(\ found in src\main.jsx, pattern:axios\ found in src\main.jsx |
| About Section | detected | pattern:id=[\''"]about found in index.html |
| Animations | detected | pattern:@keyframes found in src\style.css, pattern:animation: found in src\style |
| Contact Form | detected | pattern:id=[\''"]contact found in index.html, pattern:<input[^>]*type=[\''"]email |
| DOM Manipulation | detected | pattern:document\ found in src\main.jsx, pattern:querySelector found in src\mai |
| FAQ | detected | pattern:faq found in index.html, pattern:<details found in index.html |
| Footer | detected | pattern:<footer found in index.html, pattern:class=[\''"][^"]*footer found in in |
| Forms | detected | pattern:<form found in index.html, pattern:<input found in index.html |
| Hero Section | detected | pattern:hero found in index.html, pattern:class=[\''"][^"]*hero found in index.h |
| Navigation | detected | pattern:<nav found in index.html, pattern:class=[\''"][^"]*nav found in index.ht |
| Portfolio / Projects | detected | pattern:id=[\''"]portfolio found in index.html |
| Pricing | detected | pattern:id=[\''"]pricing found in index.html, pattern:class=[\''"][^"]*pricing fo |
| Responsive CSS | detected | pattern:@media found in src\style.css, pattern:flex found in src\style.css |
| SEO Metadata | detected | pattern:<meta[^>]*name=[\''"]description found in index.html, pattern:<meta[^>]*p |
| Services | detected | pattern:id=[\''"]services found in index.html |
| Testimonials | detected | pattern:testimonial found in index.html, pattern:class=[\''"][^"]*testimonial fo |
| Buttons | inferred | pattern:<button found in index.html |
| Cards | inferred | pattern:class=[\''"][^"]*card found in index.html |

UI details: 2 media queries • 1 event listeners • 1 forms • Responsive: Yes
External resources: <https://cdn.example.com/tailwind.css>
contact.js alone does not mean contact form — source was inspected before claims.

UI / WEBSITE PREVIEW — Live preview when runnable, else static analysis

Live preview unavailable — static project analysis completed.

Desktop Homepage
No live server detected — static analysis only.
To enable: ensure package.json has start/dev script and project is HTML/Node-runnable.

Mobile Viewport
Would render at 375x812 with same capture pipeline.

DEPENDENCIES — Manifests parsed — no hallucination

package.json — 6 packages

| Package | Version | Type |
|---------------|---------|------|
| axios | ^1.5.0 | prod |
| framer-motion | ^10.0.0 | prod |
| react | ^18.2.0 | prod |
| react-dom | ^18.2.0 | prod |
| tailwindcss | ^3.3.0 | dev |
| vite | ^4.4.0 | dev |

API INTEGRATION — Network calls detected via static scan

| Method | Endpoint | Library | File |
|--------|---------------|---------|----------------|
| GET | /api/projects | fetch | src\main.jsx:6 |
| GET | /api/user | axios | src\main.jsx:7 |
| POST | /api/contact | axios | src\main.jsx:8 |

Endpoints redacted where sensitive tokens detected. Secrets never appear verbatim.

DATABASE — Only when evidence exists

No database technology confirmed. No connection code, ORM, or schema files produced strong evidence.
Checked: connection code, models, schemas, SQL files, ORM usage.

SECURITY FINDINGS — Lightweight static scan — not a full audit

Static scan detected no obvious high-severity patterns.
Do not interpret as “secure”. This is a lightweight heuristic scan.

TESTING — Only if evidence exists

No test files or testing frameworks detected. Coverage information unavailable.
Looked for: *.test.js, *.spec.js, __tests__, tests/, jest, vitest, playwright, cypress.

DEVELOPMENT SETUP — How to run — from manifests

Startup command (detected): `npm run dev`

Steps (evidence-based):

- Install dependencies: `npm install` (package.json present)
- See README.md for project-specific instructions (excerpt on Overview page)

All scripts:

```
dev: vite
build: vite build
preview: vite preview
```

USAGE — How the project is used — from code signals

This is a frontend project. Usage is via browser: open `index.html` or run the dev server and visit `http://localhost:3000` (or configured port). No backend required for static preview.

Entry files (detected):

- `index.html`
-

LIMITATIONS — Honest, evidence-aware

- No database layer confirmed — may be stateless or uses external storage without local evidence
 - No tests detected — coverage and regression safety unknown
 - Live preview unavailable — static analysis only (project not runnable in sandbox)
 - All findings are heuristic; false positives/negatives possible. Review source before production decisions.
-

FUTURE IMPROVEMENTS — Suggested, not prescribed

- Add automated tests (Jest/Vitest/Playwright) and CI coverage gate
 - Consider TypeScript for type safety in larger codebase
-

CONCLUSION — Wrap-up

`acme-portfolio` was analyzed deterministically on 2026-08-28. The resulting documentation reflects **evidence, not assumptions**. All sections were generated from file contents, manifests, and static patterns — with confidence levels and omitted sections where evidence was insufficient.

Next steps: Use the editor to reorder/hide sections, edit text, switch template or page size, then export PDF. Keep analysis separate from presentation — re-analyze after code changes.

Built with 0xPDFForge — Turn any codebase into beautiful documentation.
